TOE GROW™ GEL

SBS Equine

SHOE BOND SYSTEMS, INC.

Repairs feet, hair and skin at a cellular level. Promotes faster healing and growth. Apply along coronary band, on bruised heels, hoof cracks, and damaged clefs and frog. Increases cell growth and enhances collagen production.

Copper-Peptide Complex

How it works: Toe Grow is a copper-peptide complex which has shown to increase cell growth and enhance collagen production (builds connective tissue & cell structure).

Directions: Apply the Gel generously along the coronary band, on cracked and damaged areas of the feet including the heels, clefs and frog. Promotes healing and closure of cracks. Also repairs cell damaged hair and skin. **SHAKE WELL** before each use. Best results if applied daily.

Caution: Avoid contact with eyes. Flush eyes with water if contact should occur. Wash hands after applying. Gel contains no dyes or fragrances. Natural color is green. Any staining of hair and skin is temporary and result of copper molecules (like a copper bracelet against your skin).

Net 10 fl. oz.
