

Rescue® Fly Trap

Sterling International

Description:

Perfect for lawn, garden, camping and farm use. No pesticides. Complete with attractant. New improved attractant system. Dissolves and activates when you add water. Just add water and hang.

Instructions:

Cut plastic on top cap at dotted line. Pull open and attach string or wire. Add water to fill line on bag. Don't allow trap to dry out. Hang outdoors where flies are a problem. When full, close cap. Dispose in trash.

Helpful Hints:

1. Weather conditions affect fly activity and trap effectiveness. In hotter temperatures, place traps in trees or bushes. In cooler temperatures, flies will be more active where it is warmer, so place traps in sun exposed areas. Fly activity will diminish in temperatures below 75°F.
2. Place traps outdoors near a fly source (garbage, compost pile, dog run, stable, feedlot, etc.) or in barns where there is some air movement. Avoid strong winds. Strong odor may occur if not placed in a well-ventilated area.
3. Place traps at various locations and heights to determine most effective placement. Allow 2-5 hours for activation.

Safety Information:

Keep out of reach of children, pets and livestock. If swallowed, drink water to dilute. Do not induce vomiting. In case of eye contact, rinse with water for 15 minutes.
