

Organic D/Earth

Thomas Laboratories, Inc.

A non-toxic mineral of crushed fossils that can be used in feed daily, around animals during the parasite season, or year round for maximum benefit. Diatomaceous earth consists of fossilized remains of diatoms, a type of hard-shelled algae.

Directions:

Kennel Use: Sprinkle around kennel or bedding areas where there is a high concentration of parasites.

Oral Use: 1 to 2 tablespoonfuls per 50 lbs of body weight as needed as a nutritional supplement for animals with skin & coat needs during the parasite season.

Ingredients: 100% Diatomaceous Earth. *Food Grade quality.

** Product is labeled "not for human consumption" to meet the legal requirements of the FDA for products sold and marketed for pet use and consumption. While many products sold for "Pet Use" may be similar to products used by humans, Thomas Laboratories is obligated to remain within the boundaries set forth by the FDA regarding correct and current labeling of our products.*

*** Diatomaceous Earth, while safe to swallow, can be a lung irritant if breathed in. Please take all precautions necessary (dust masks, respirators, etc.) to avoid breathing in dust. When applying this product to pet bedding or household carpeting, furniture, or flooring, please apply sparingly and allow dust to settle before re-population of pets and humans*
