

Durasole™

AFS Distributing Co

Durasole is an antibacterial, antifungal, fixing agent, formulated to thicken and toughen the equine exfoliating sole and frog. It is highly concentrated and intended for dropwise use.

Durasole is extremely effective in the relief of sole soreness and is widely used on horses that work or perform in hostile environments and in transitioning horses from shod to barefooted.

Durasole is effective in the control of Thrush and White Line Disease when aerobic conditions are established and maintained at the infection site.

Active Ingredients:

isopropanol, formalin, methanol, polyvinylpyrrolidone-iodine, tannic acid, gentian violet

Directions:

Apply dropwise to dry sole and frog. Disperse with brush. Do not apply more product at one time than the frog and sole will absorb. **Wear gloves and safety lenses. Do not inhale vapors.** If product comes in contact with skin, rinse with alcohol. In case of accidental eye contact, rinse immediately with water and seek medical attention.

Cautions:

For topical use on equine only. **Harmful or fatal if ingested. Keep out of reach of children.**

Contains less than 1% titerable iodine
