

## ProCare® Liquid Bandage, 14.2 mL (0.5 oz)

Use only on dogs and/or cats. Use on minor cuts and abrasions only. Do not use for deep puncture wounds or on infected areas. Clean and dry the area, then apply a few drops, forming a light, thin coating. A second coating may be applied if necessary after the first layer has dried. Do not apply near or in the eyes of the animal. The protective layer will peel off within 5 to 7 days. Can be removed from surfaces using acetone or nail polish remover.

**Warning:** Can bond skin instantly; eye irritant. Avoid contact with the skin. If contact occurs wash with soapy water, then gently peel bonded area apart. If irritation persists on the skin, seek medical attention. If eye contact occurs, immediately rinse with large quantities of water and seek medical attention. Use in adequately ventilated areas. Contains methoxy cyanocrylate.
